

## Assignment No. – 2

The screenshot shows a web browser with two tabs: 'WhatsApp Web' and 'UserAuthApp'. The address bar displays 'localhost:4200/login'. The page has a title 'Login'. It contains a form with a 'Username:' label and a text input field containing 'ankitaadam'. Below it is a 'Password:' label and a password input field with six dots. A green 'Login' button is positioned below the password field. Below the button, a red error message reads 'User not found. Please register first.' At the bottom, there is a link that says 'Don't have an account? Register'.

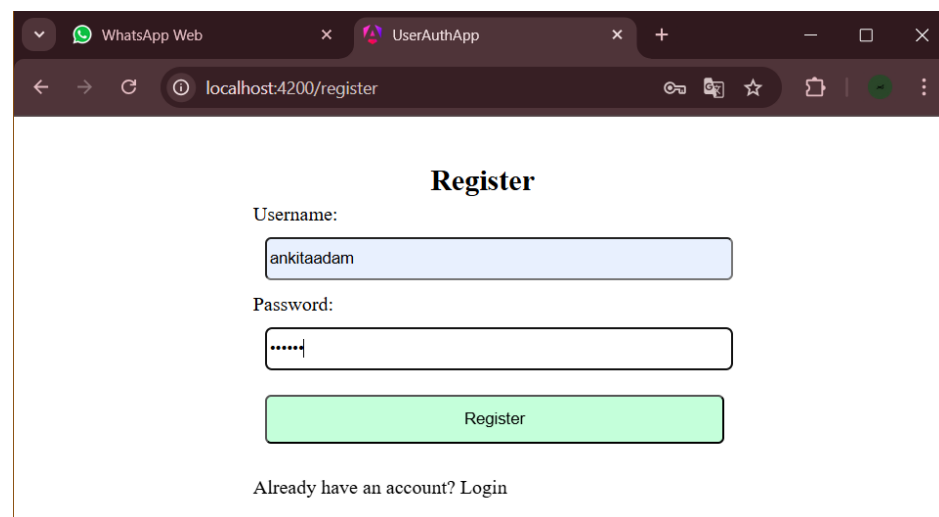

**Login**

Username:

Password:

User not found. Please register first.

Don't have an account? [Register](#)

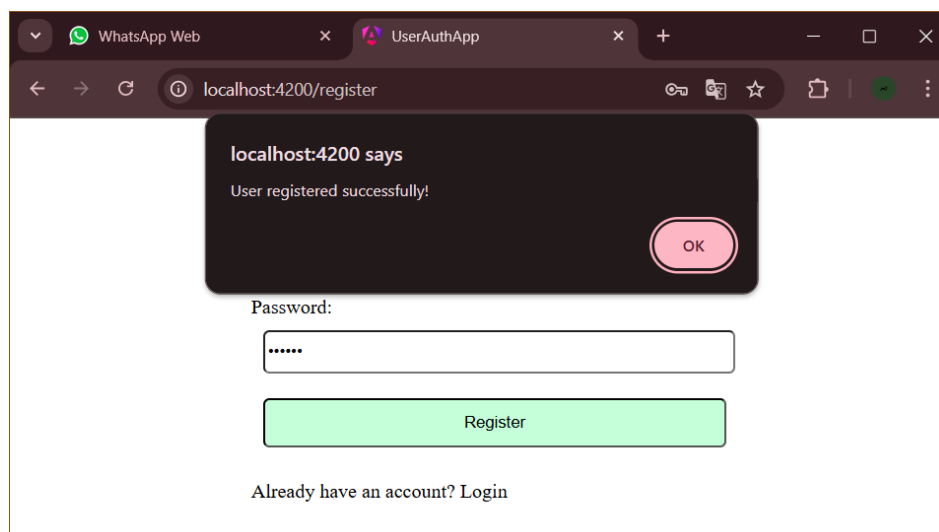

The screenshot shows the 'UserAuthApp' browser tab with the address 'localhost:4200/register'. The page title is 'Register'. It features a form with a 'Username:' label and a text input field containing 'ankitaadam'. Below that is a 'Password:' label and a password input field with six dots. A green 'Register' button is located below the password field. At the bottom, there is a link that says 'Already have an account? Login'.

**Register**

Username:

Password:

Already have an account? [Login](#)

This screenshot shows the same 'register' page as the previous one, but with a dark toast notification overlay. The notification says 'localhost:4200 says' and 'User registered successfully!' with an 'OK' button. The form fields and buttons are still visible behind the notification.

**localhost:4200 says**  
User registered successfully!

Password:

Already have an account? [Login](#)

WhatsApp Web   UserAuthApp
